

Gentlemen;

I am writing to protest HR4060 which strikes me as nothing more than an attempt by the conglomerates that control FM radio to kill off a potential competitor.

I got totally sick of the junk nature of commercial radio some time ago and began subscribing to satellite radio. I know that many other people have made the same discovery: commercial radio sucks and satellite radio is a far better alternative.

Please leave satellite radio alone and allow it to grow in any direction possible.
